CAREER SUMMARY

Full-Stack Software Engineer with 3+ years of experience building secure, scalable software that solves real-world problems. Experienced in C#, .NET, REST APIs, SQL Server, and CI/CD, with a strong foundation in system design, performance optimization, and modern web development.

PROFESSIONAL EXPERIENCE

Web Engineer

November 2024 – Present

DHR Health

- Design, develop, and maintain full-stack web applications and RESTful APIs using Blazor Server, ASP.NET Core, and SQL Server that support more than 5,000 internal and public users.
- Led the migration of multiple legacy ASP.NET WebForms applications to Blazor Server and ASP.NET Core, improving maintainability and reducing development time by 10%.
- Design and optimize SQL Server databases using Entity Framework Core and LINQ, improving query performance and supporting scalable application architecture.
- Integrate third-party APIs, implement authentication using JWT, OAuth, OpenID Connect, and SAML, and automate deployments through GitHub Actions CI/CD pipelines.

Program Specialist (Web Development Focus)

January 2023 – July 2024

The University of Texas Rio Grande Valley

- Modernized the college's websites using HTML, CSS, and JavaScript, improving usability, accessibility, and overall user experience while contributing to a 12% increase in website traffic.
- Designed and developed a database-driven inventory management application using Microsoft Power Platform, streamlining inventory tracking and improving data retrieval efficiency by 28%.
- Improved website accessibility and performance by optimizing front-end code, troubleshooting issues, enhancing SEO, and implementing WCAG standards to create a more reliable user experience.

Student Web Developer

June 2021 – September 2021

The University of Texas Rio Grande Valley

- Built responsive websites using HTML, CSS, and JavaScript, improving user engagement through cross-browser compatibility and adaptive design.
- Worked with stakeholders to gather requirements and deliver software enhancements using Agile development practices.
- Improved website accessibility and performance by implementing WCAG 2.1 standards, earning recognition from the center director for exceptional contributions.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL, C/C++

Frameworks & Libraries: .NET, ASP.NET Core, Blazor Server, Entity Framework Core, Next.js, FastAPI

Databases: SQL Server, PostgreSQL, MongoDB

Tools: Git, GitHub Actions, Docker

Concepts: REST APIs, CI/CD, Microservices, Database Design, Query Optimization, Authentication & Authorization, Secure SDLC, OWASP

EDUCATION

M.S. Computer Science

Expected August 2027

Georgia Institute of Technology

B.S. Computer Engineering

May 2024

The University of Texas Rio Grande Valley
